

Your street will be  
Surface Sealed  
WEDNESDAY

---

**POINTS TO REMEMBER:**

1. You will have access to your drive at all times. During the short application period any work crew member can assist you.
2. Remove parked cars between the hours of 7:30 a.m. – 5:00 p.m.
3. Please observe all signs & flagman's directions.
4. Sand cover will be swept up within two days. Use **CAUTION** when driving on loose sand.
5. Drive **SLOWLY** if you accidentally enter a freshly treated area. **5 m.p.h.**
6. For special events, moving, garage sales, etc, call 1-800-333-6309 for assistance.
7. Keep children & pets out of treated areas to avoid tracking into houses.
8. Material tracked onto drives will weather off in three weeks or less, leaving no stain.
9. Please refrain from using lawn sprinklers, washing cars, etc on the day of treatment. Pavement must be dry.
10. Rain will delay work until the following day.
11. Remember, any work crew member can assist you during actual application.

This **Preventive Maintenance** process is a most economical use of your tax dollar.

Thank you for your cooperation.

**Pavement Technology Inc.**

Your Street will be  
Surface Sealed  
WEDNESDAY

---

**Why is this process necessary?**

Any work performed on your road normally causes some inconvenience for residents.

We apologize for any temporary inconvenience our work may cause.

However, the work process we will be doing will extend the life expectancy of your road and insure a smooth ride for years to come. Extending the life of the roadway helps reduce future costs and your tax dollars needed for paving.

The penetrating sealer we are using has been the most widely used **Pavement Rejuvenator** in the market for over 50 years. This product simply replaces the vital ingredients that have been lost from the pavement's binder over time due to exposure to the sun's UV rays and wet weather. When applied on new pavements, the product used helps to protect the asphalt from damage due to exposure to the elements.

Everyone understands that we would not buy a new car and never perform an oil change on it. Oil changes are considered part of the preventive maintenance for your car to make it last for many years. Asphalt roads are really not any different. Without timely preventive maintenance, an asphalt road will deteriorate faster than necessary.

The maintenance treatment being provided on your street will help your Agency protect one of their largest assets and give you a road that will provide years of additional service.

Thank you for your understanding and cooperation.
