Kugler Mill Road Improvement Project **Sycamore Township**

May 28, 2021

Dear Resident,

With the water main and storm sewer now complete, we are ready to install the new concrete curb on the north side of the road. Curb work will begin Tuesday June 1st at 7:00 AM and will be progressing throughout the week. Please have all vehicles out of your driveway by 7:00 AM. Once the curb is poured the concrete will need to harden prior to driving on it. During the evening hours you may park in the eastbound lane (south side of the road). However, please be mindful work will resume the following morning at 7:00 AM. You may resume parking in your driveway once a clear path of access has been installed to your driveway.

As always, this work is weather dependent but we will do our best to continue to move forward. We truly appreciate your cooperation with this matter. Please continue to use caution when driving through the project and be aware of the crews working. Once again, thank you for your cooperation and patience during this phase.

If you have questions or need additional information please contact Mike Saylor with Rack & Ballauer Excavating at 513-738-7000, Ext 21.
