RECEIVED

To whom it may concern,

I have recently purchased the home at 8462 Deerway Dr and have been making major upgrades to the landscape and outside of the home. I am looking to install a picket fence to the side yard that faces Deerway so my dog has a safe place to play. I did consider the underground electric fence, but as I am sure you know this only keeps your pet in your yard. Since I have move in there have been several instances of larger dogs roaming in the neighborhood. My dog Newman (6 lb mini dachshund) would not be able to defend himself if a larger dog were to come into the yard and attack him. I am looking to extend the picket fence to the front edge of the gutters of my home so I do not have to cut down a 15 year old dwarf weeping cherry tree. I have discussed this with my neighbor Jack Baldwin and he has given his approval for the fence that borders his property. I would also like to extend the privacy fence on the rear of my home to end of the home for privacy. I have also discussed this with who owns the home at Kugler Mill and he has given his approval for the extension of the fence that borders his property. Below you will see pictures and descriptions of the 2 styles of fence I am hoping to install in locations depicted on the Picture I have provided.

• Severe Weather White Cedar Gothic Pressure Treated Wood Fence Picket Panel (Common: 3.5-ft x 8-ft; Actual: 3.46-ft x 8-ft)Severe Weather White Cedar Gothic Pressure Treated Wood Fence...

Spruce Pine Fir Stockade Wood Fence Privacy Panel (Common: 6-ft x 8-ft; Actual: 5.92-ft x 8-ft) Spruce Pine Fir Stockade Wood Fence Privacy Panel (Common: 6...

Sincerely,

Norman T. Rolf
