Proposed plan for fence.

The proposed fence will follow the path of the existing fence. The existing fence is a privacy fence with full gate on the East Side of the dwelling and a 22.87 foot section of split rail on the West side of the dwelling. We would like to replace the entire fence with 6 foot cedar privacy fence. This fence would include a double 8 foot gate on the West side of the home and a 4 foot gate on the East side of the dwelling. As the rear portion of the neighbors lot to the West side of the home backs up to the side of our house we are would like to make this section a privacy fence. As the Eastern portion of the fence was previously a privacy fence we would like to replace this portion of the fence with a similar fence with the same placement (extending to front of home). Enclosed are pictures illustrating the current fence, fence path of Eastern side at the time of purchase of the home, layout of the fence, and kind of the fence proposed. In addition this copy has been signed by the two neighbors with abutting lots which would most like benefit from the replacement of the fence taking into account the above plans.

The purpose of the proposed fence would be to contain our dog, help our neighbor keep his dogs safe in his yard, give our child a safer play environment, prevent people from entering our lot.

The below photo illustrates the rear portion of home to West abutting the side our home.
